

Northcliffe CRC has a NEW PHONE NUMBER 0455 438 890

Please update your contact lists. The old phone number will work for a few more months before being switched off permanently.

Film Survey

Our double feature film screening of *Dark City* and *The Matrix* was awesome but practically no one came along. While four of us had fun munching on popcorn, lounging around on beanbags and watching some classic cinema, we need the film club for adults to be more popular to be viable. This is not a problem we have had with our kids cinema events.

To help us make our film club as successful as possible, please return the survey from this edition of the Karri Pigeon. We want to make our film club as successful as possible.

Claire Nixon is our New CRC Trainee

Please welcome Claire, a new friendly face in the CRC who will be with us for the next 18 months. Several days before her planned starting date Claire was in a car accident but she is bouncing back and is now rapidly learning the ropes... She writes:

Timing is everything and luckily for the Nixon family while we may have lost one leg we now have two younger ones living on the farm. Yes it's true I am now a full time Northcliffe resident, it even says it on my driver's licence. Working 3 days a week at the CRC and playing with sheep in my spare time. Please forgive me if I've forgotten your name, blame it on the concussion rather than the years since I've seen you!

a little CRC

Missing mobile phone calls?

Here's how to extend the ring time on your mobile phone **on the Telstra network**. Similar but different instructions apply for Optus or Vodaphone users.

By default Android and iPhones will ring for 15 seconds before diverting to voice mail. Is this a setting designed for big cities so you don't hear all the mobile phones constantly ringing on trains and buses, in restaurants and the like?

Here's how you can give yourself **30 seconds** to get to the phone. The instructions are almost identical for iPhones and Android phones (beware—if you have call forwarding turned on this will reset it).

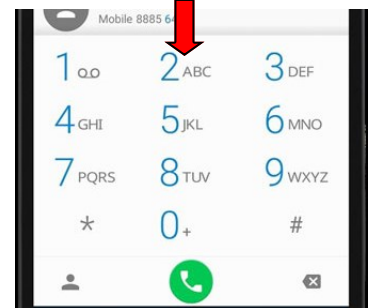

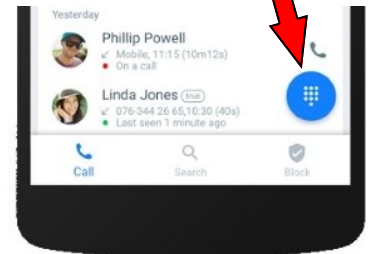

EXTEND YOUR MOBILE PHONE RING TIME

First open your phone dialler, just as you do when you make any phone call. You need the number keypad:

iPhone ↓

Android ↓

Dial **61*10130#** →

The * symbol is below the 7 on your keypad and the # symbol is below the 9. A moment or two after pressing the green phone symbol you should then see an onscreen message a bit like this:

"MMI code started... Call forwarding registration was successful"

Check your new settings are working by making another call:

Dial *#61# →

You should see an onscreen message a bit like this:
"Call forwarding... Sync: +61101 after 30 seconds."

Monday, Tuesday, Wednesday 10am to 5pm • Thursday, Friday 10 am to 6pm
