

Local Plumber Provides Vital Help During Covid 19

You can now have a good scrub down before entering Northcliffe's Community Resource Centre, with newly installed hand washing facilities outside the front door.

After watching a few videos with advice from the disease specialists, our CRC Manager had an epiphany about Covid 19 lockdown measures. We weren't looking at a short lock-down, and we weren't looking at an 'all or nothing' lock-down. How to maintain confidence and give the Northcliffe CRC a chance to credibly control disease risks and to be able to continue to support the community throughout the many, many months of Covid 19 precautions to come?

As the first of many steps to reduce the risks of Covid 19 transmission in the NCRC environment, the idea of a hand basin right outside our front door, was born. The next step was to phone our favourite plumber, Reedy.

Reedy and Tamla from JPR Plumbing and Gas came to our rescue! The Shire of Manjimup was also helpful, providing permission to proceed with this unconventional sink installation within a few hours.

Supplies donated by JPR Plumbing and Gas to support this project were valued at \$750. Our sincere thanks to them for their generosity and very quick turnaround.
